

Web-Based Application Development

26.1 Faculty of Computing

Lab sheet 02

Task 1

Create a simple web page named "music.html" centered around different music genres.

(a) Table Structure

1. Create a table with 5 columns as follows:

- Genre
- Sub Genre
- Album Cover
- Video Preview
- Audio Sample

2. Merge the heading using colspan and display: Top Music Hits – 2026

3. Use rowspan in the Genre column as follows:

- Pop (2 sub genres)
 - Dance Pop
 - Indie Pop
- Rock (3 sub genres)
 - Classic Rock
 - Alternative Rock
 - Hard Rock

(b) Media Requirements

- Add a video preview using <iframe> (YouTube embed)
- Add an audio sample using <audio controls>

(c) Styling Requirements

- Center the table on the page
- Use borders with border="1" and border-collapse
- Apply a light blue background for table headings
- Center-align all content inside the table
- Add padding inside table cells

Task 2

Create a simple website based on the theme “Travel Sri Lanka”. Center all content on the page and add a background color.

Add a main heading at the top of the page: “Explore Sri Lanka”.

Add a short paragraph (4–5 lines) describing Sri Lanka as a travel destination (e.g., beaches, mountains, wildlife, culture)

Create the table below to display travel packages. Use a different background color for the header row.

Travel Packages			
Destination	Activities	Duration	Price
Ella	Hiking	2 Days	\$150
	Train Rides	1 Day	\$80
Yala	Wildlife Safari	1 Day	\$120
	Camping	2 Days	\$200

Create a form titled: “Book Your Trip”

Use hover effect on submit button.

Outline the form and have rounded borders using “border-radius”.

Book Your Trip
